VENTS S Series

Axial fans for exhaust ventilation with the capacity up to $341 \,\mathrm{m}^3/\mathrm{h}$.

Applications

- Continuous or periodic exhaust ventilation of bathroom, showers, kitchens and other utility spaces
- Ventilation shaft mounting or connection.
- Low to medium air flow motion for short distances at low air resistance.
- Compatible with 100, 125 and 150 mm air ducts.

Design

- Modern design and aesthetic look.
- The casing and the impeller are made of high-quality durable ABS plastic, UV resistant.
- The intellectual impeller design makes the fan efficiency high and the service life long.
- Ultra thin front panel.
- Insect screen.
- Protection rating IP 34.

Motor

- Reliable and low-watt electric motor.
- Designed for continuous operation and requires no maintenance.
- Equipped with overheating protection.

Modifications and Options

S1 – shortened flange model.

S K – fan is equipped with a backdra damper for back flow preventing.

S L – the motor is equipped v th ball bearings for long service in (a , thousand hours) and fan it unting

at any angle. The bearings are mainten ncefree and contain enough gree e for the entire operating period.

S turbo – high poviered motor.

S 12 - mc lification with low-voltage V C power supply.

- equipped with a regulated timer w .h the operating time from 2 to 30 ninutes.

STH – equipped with a timer with the operating time from 2 to 30 minutes and a

humidity sensor with the threshold value from 60 to 90%

SV - equipped with a pull cord switch.

SVT – equipped with a pull cord switch and a regulated timer with the operating

time adjustable from 2 to 30 minutes.

SVTH – equipped with a pull cord switch, regulated

timer with the operating time adjustable from 2 to 30 minutes and a humidity sensor with the operating threshold range from 60% to 90%.

Control

- The fan is controlled by a room light switch. It is not included in the delivery package
- The fan is controlled by the built-in pull cord switch V. Not applied in case of ceiling mounting.
- Speed control is possible through a thyristor. speed controller (see Electrical Accessories). veral fans may connected to the same reg 'ator unit.

Automatic:

- By the electronic control unit BU-1-60 (see Electrical Accessories). The control unit is supplied separately.
- By the timer T (the built-in run-out timer enables the fan operation within 2 to 30 minutes after the fan switching off).
- By the humidity sensor and timer **TH** (if the humidity level in the room exceeds the sensor threshold adjustable value within 60-90% the fan switches automatically on and operates until the humidity level drops to the standard level, after that the fan continues operating within the time period according to the timer setting, then shuts down).

Mounting features

- The fan is mounted directly into the ventilation shaft.
- Flexible duct application is recommended in case of remote location of the ventilation shaft. The air duct is connected to the fan exhaust flange through a clamp.
- Fixed to wall by self-tapping screws.
- Suitable for ceiling mounting.
- For 12 V low-voltage motor fan connection to 220 V / 50 Hz power mains use the step-down transformer TRF 220/12-25 that is available upon separate order.
