

# Iso-Mix

## Sound-insulated inline mixed-flow fans

### Use

- Supply and extract ventilation systems installed in various premises with high requirements to the noise level.
- For ventilation air ducts requiring high pressure, powerful air flow and low noise level.
- Compatible with Ø 100 up to Ø 315 mm air ducts.

**Air flow:**  
up to 1920 m<sup>3</sup>/h  
533 l/s

**Power:**  
from 24 W

**Noise level:**  
from 23 dBA

### Design

- The casing is made of polymer-coated steel, internally filled with 50 mm mineral wool thermal- and sound-insulating layer.
- Special inner perforation of the casing and sound-insulating material are designed for wide-frequency sound absorbing.
- Mixed-flow impeller made of high-quality plastic.
- The diffusor, the specially profiled impeller and directing vanes provide high performance and powerful pressure combined with low noise operation.
- External airtight terminal block on the fan casing for power supply.
- Mounting brackets on the fan casing for mounting to the floor, to the wall or ceiling.

### Motor

- Double-speed (three-speed for Iso-Mix 200) single-phase high-efficient motor with low energy demand on ball bearings.
- Overheating protection due to built-in thermal switches.
- Motor ingress protection rating IPX4.

### Speed control

- Speed selection with a built-in speed switch (US option) or an external multi-speed controller (specially ordered accessory).
- Smooth speed control is possible either with an integrated speed controller (FR1 option), an external thyristor or transformer speed controller (specially ordered accessory) when connected to the maximum speed terminal.

### Mounting

- Due to its compact design the fan is the ideal solution for mounting in limited spaces.
- The fan is suitable for mounting in any section of the ventilation system from intake to the end of the ductwork.
- Wall or ceiling mounting with a special mounting plate on the fan casing.

### Modifications and options

- T:** turn-off delay timer adjustable from 2 to 30 minutes.
- US:** three-position speed switch.
- FR1:** smooth speed controller adjustable from 0 to 100 % and power cable with mains plug.

- G1:** speed controller, temperature controller with external temperature sensor (cable length 4 m), power cable with mains plug.

- GT1:** speed controller, temperature controller with external temperature sensor (cable length 4 m), 5 min timer switch and power cable with mains plug.
- GI1:** speed controller, temperature controller with integrated temperature sensor and power cable with mains plug.
- GTI1:** speed controller, temperature controller with integrated temperature sensor, 5 min timer switch and power cable with mains plug.
- The **G1** and **GI1** modifications enable automatic speed control depending on indoor temperature. The optimal ventilation solution for premises requiring permanent temperature control as greenhouses, orangeries, etc.
- W1:** power cable with mains plug.

To comply with ErP 2018 it is necessary to use a speed controller and local demand control typology (connect the sensor).
